Pleasant Ridge Manor Retirement Plan

Investment Performance Review
Period Ending June 30, 2026

MARINER

2nd Quarter 2026 Market Environment

The Economy

- **Economic growth remained resilient** despite restrictive monetary policy and geopolitical uncertainty, supported by healthy labor markets, continued business investment, and steady consumer spending. Corporate capital expenditures, particularly those tied to artificial intelligence infrastructure, continued to provide an important source of economic momentum.
- **Inflation temporarily accelerated** as higher energy prices flowed through headline inflation measures, prompting the Federal Reserve to maintain a cautious policy stance. While policymakers left interest rates unchanged during the quarter, expectations shifted toward higher-for-longer rates as markets reassessed the path of monetary policy.
- **Looking ahead,** easing oil prices and moderating inflation pressures should provide a more constructive backdrop, although the pace of economic growth will likely depend on continued business investment, labor market stability, and the Federal Reserve's ability to balance inflation control with sustaining economic expansion.

Equity (Domestic and International)

- **Global equity markets posted strong gains** as geopolitical concerns eased, corporate earnings remained resilient, and investor enthusiasm surrounding artificial intelligence fueled another leg higher in risk assets. U.S. equities recovered quickly from first-quarter volatility and finished the quarter near record highs.
- **Technology remained the market leader,** driven by semiconductor manufacturers and companies supporting AI infrastructure, while improving market breadth allowed small- and mid-cap stocks, Industrials, and Financials to participate more meaningfully in the rally. International equities also advanced, with emerging markets benefiting from significant exposure to semiconductor production and AI supply chains.
- **While AI continues to drive market leadership,** improving participation across sectors and company sizes is a constructive development for diversified portfolios. Continued earnings growth and expanding leadership beyond mega-cap Technology could provide a healthier foundation for equity returns going forward.

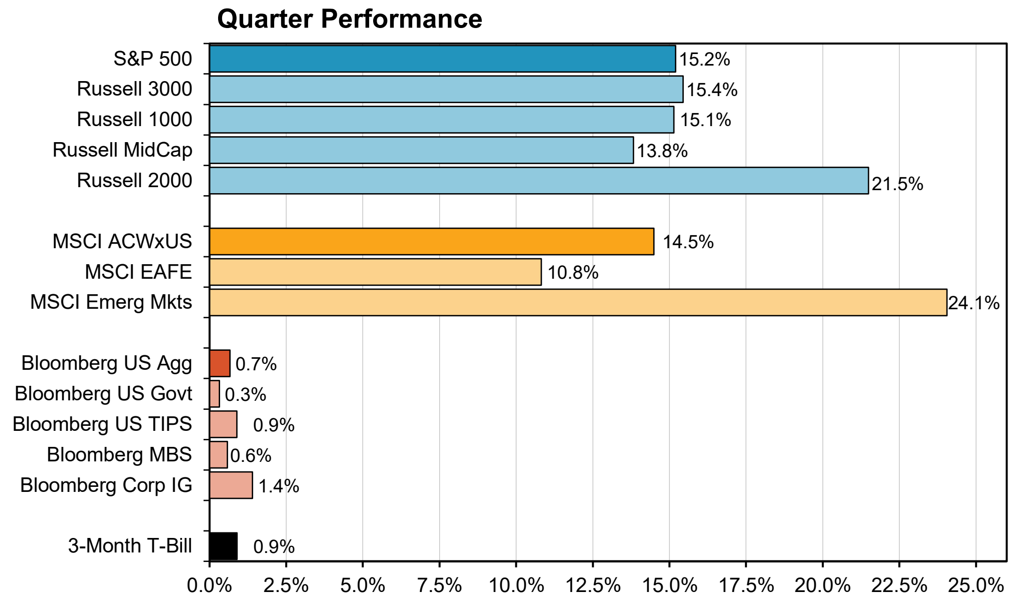
Fixed Income

- **Bond markets generated modest positive returns** despite higher Treasury yields and evolving interest rate expectations. Strong corporate fundamentals supported investment-grade and high-yield credit, allowing corporate bonds to outperform comparable government securities.
- **Interest rate volatility remained elevated** as markets weighed persistent inflation against easing energy prices and changing Federal Reserve expectations. Although policymakers maintained current policy rates, investors increasingly priced in the possibility that interest rates could remain elevated for longer.
- **Higher bond yields continue to improve the outlook** for fixed income investors by providing more attractive income opportunities and restoring bonds' role as an important source of diversification within balanced portfolios, even if near-term rate volatility persists.

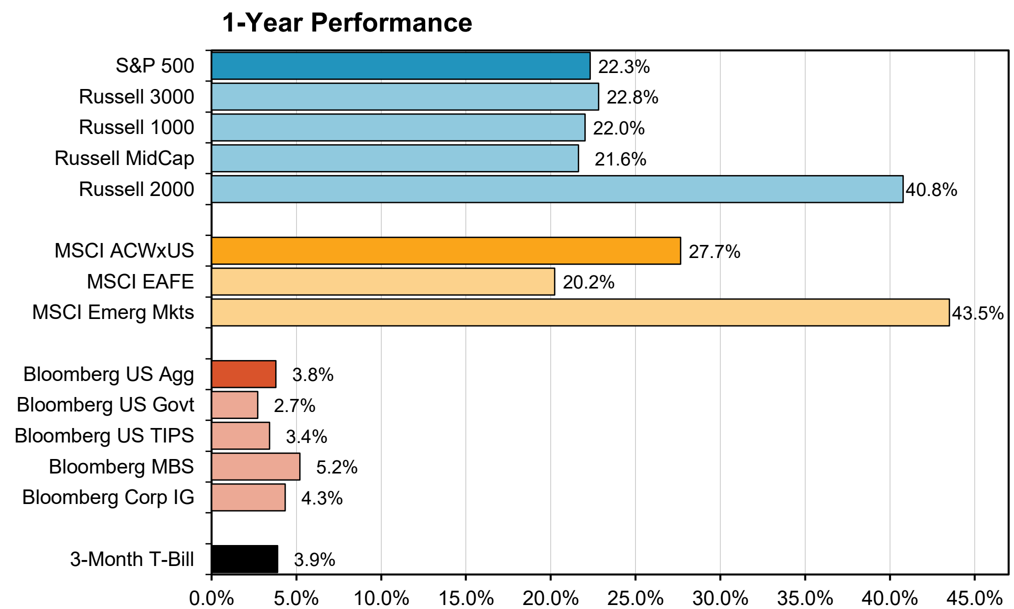
Market Themes

- **Artificial intelligence remained the dominant investment theme,** with continued spending on semiconductors, data centers, electrical infrastructure, and cloud computing supporting earnings growth across Technology, Industrials, Utilities, and Materials. Corporate investment plans suggest the AI buildout remains in its early stages.
- **Market leadership broadened** as improving economic confidence and attractive valuations supported stronger performance among small- and mid-cap companies alongside continued strength in Technology. Meanwhile, declining oil prices and easing geopolitical tensions helped reduce one of the market's largest near-term risks.
- **Investors will continue focusing on several key themes** through the remainder of the year, including the sustainability of AI-driven earnings growth, the trajectory of inflation and Federal Reserve policy, and whether broader market participation continues alongside elevated equity valuations.

- Small caps led domestic markets as participation broadened beyond mega-cap Technology.
- Emerging markets benefited from semiconductor strength and continued AI infrastructure spending.
- Developed international equities advanced but trailed emerging markets due to lower Technology exposure.
- Investment-grade bonds posted modest gains despite rising Treasury yields and policy uncertainty.
- Cash and government debt lagged as investors favored equities and credit over defensive positioning.

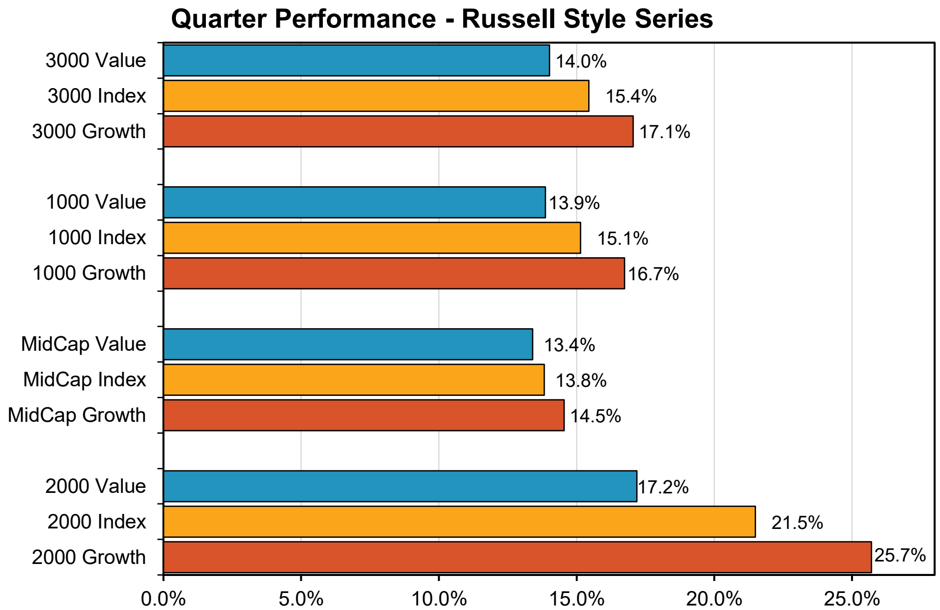


- Emerging markets led returns, driven by AI-related semiconductor demand across Asia.
- Small caps outpaced large caps as improving fundamentals attracted broader investor interest.
- Developed international stocks generated solid gains despite more modest Technology exposure.
- Corporate bonds outperformed Treasuries as credit spreads remained historically tight with structured MBS outperforming over the full year.
- Treasury bills provided stability and income but trailed risk assets over the period.

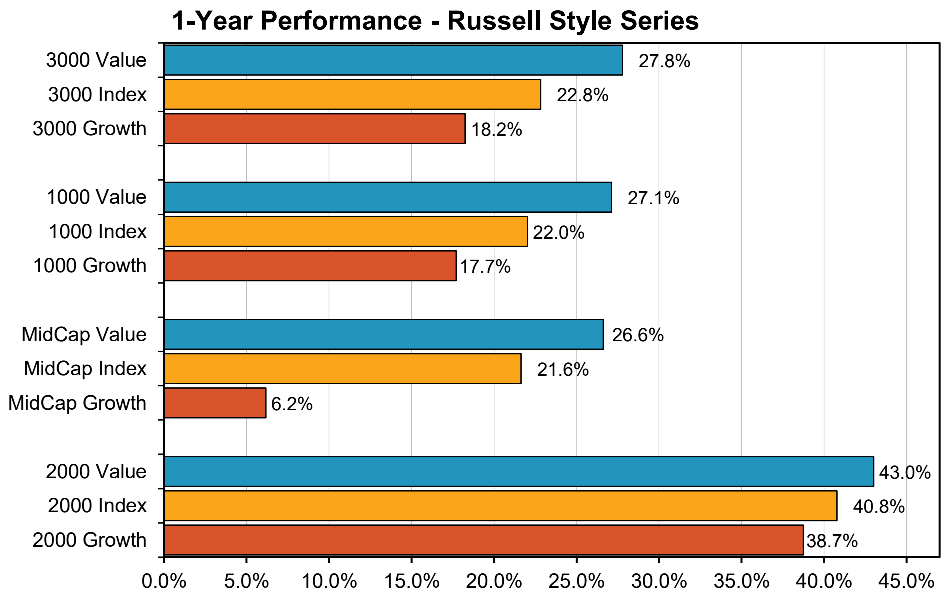


Source: Investment Metrics

- Small-cap growth led domestic equities as AI-related enthusiasm expanded beyond mega-cap Technology.
- Improving market breadth supported stronger returns across mid- and small-cap companies.
- Growth outperformed value in every capitalization segment as Technology leadership reaccelerated.
- Large-cap stocks posted strong gains, though leadership broadened beyond the largest Technology companies.
- Investor optimism surrounding capital spending and economic resilience favored cyclical sectors over defensives which benefitted growth at the relative expense of value.
- Broad participation across styles and market capitalizations reflected improving confidence in the economic outlook.

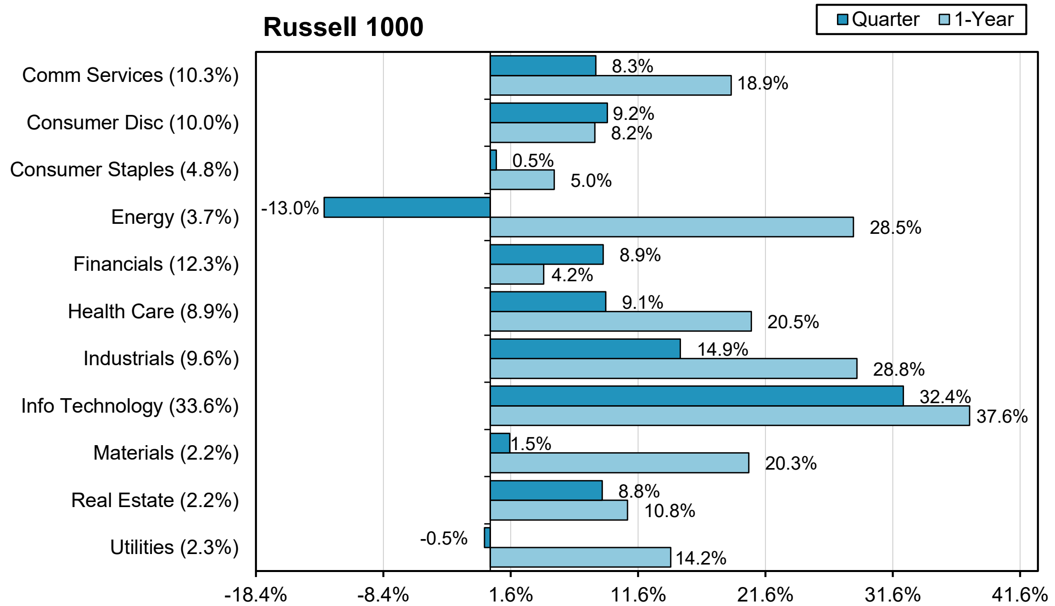


- Small-cap value outperformed as improving fundamentals narrowed the performance gap with large-cap stocks.
- Value stocks generally outpaced growth over the year despite Technology's strong quarterly rebound.
- Large-cap returns remained supported by resilient earnings and continued AI-related investment.
- Mid-cap value outperformed growth as industrial, financial, and cyclical sectors strengthened.
- Smaller companies benefited from improving domestic growth expectations and attractive relative valuations.
- The sharp quarterly recovery in growth stocks narrowed, but did not eliminate, value's one-year leadership.

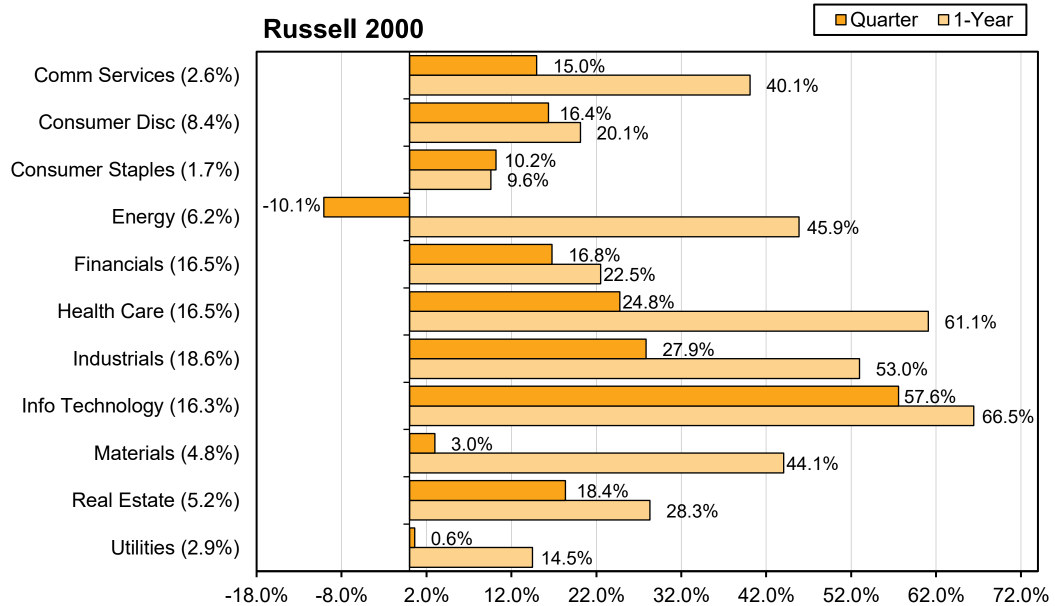


Source: Investment Metrics

- Technology dominated quarterly returns as AI infrastructure spending accelerated across semiconductors and hardware.
- Industrials benefited from expanding capital investment and improving manufacturing activity.
- Financials underperformed despite healthy credit conditions, reflecting investors' preference for sectors with stronger earnings growth tied to AI and capital spending.
- Energy was the quarter's weakest sector as oil prices retreated following easing Middle East tensions, reducing earnings expectations after the earlier price spike.
- Health Care recovered from first-quarter weakness but trailed Technology over the past year.
- Over the trailing year, Technology, Industrials, and Energy remained leadership sectors despite broader quarterly participation.



- Technology led small-cap gains as AI suppliers and infrastructure companies attracted renewed investor demand.
- Industrials outperformed on improving domestic growth expectations and increased business investment.
- Health Care posted strong quarterly gains but remained volatile across the trailing year.
- Financials advanced as improving economic confidence supported regional banks and lenders.
- Energy underperformed as falling crude prices reduced earnings expectations across the sector.
- One-year returns show leadership extending beyond Technology, highlighting stronger cyclical participation among smaller companies.



Source: Morningstar Direct

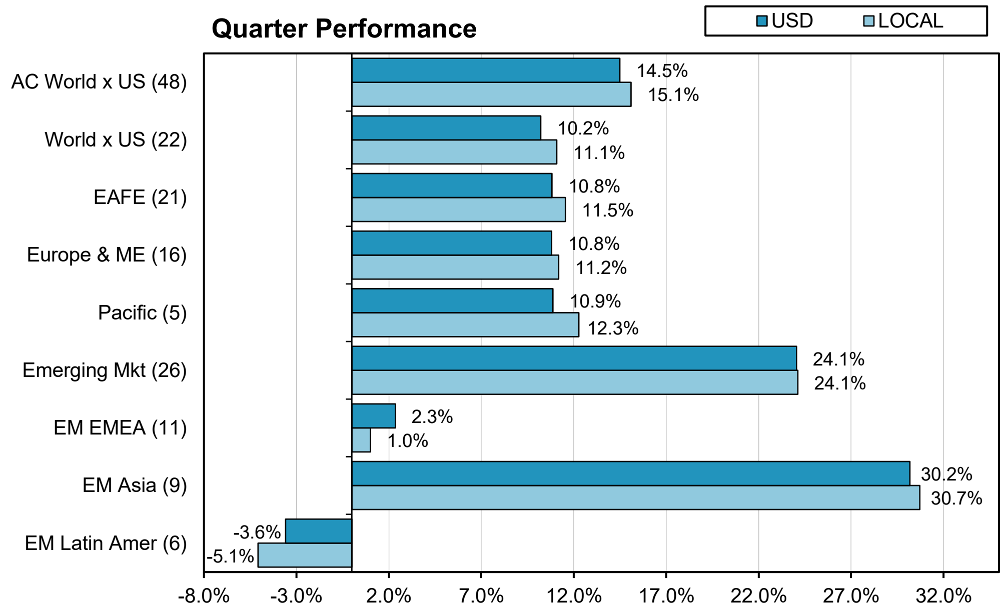
- Emerging markets led global returns as AI-driven semiconductor demand boosted Asian Technology exporters. This, however, was specific to the Asian region as the EMEA and Latin American regions were flat or negative.
- Emerging Asia significantly outperformed other regions, led by Taiwan and South Korea's chip manufacturers.
- Developed international markets posted solid gains as easing geopolitical risks improved investor sentiment.
- European equities benefited from resilient Financials and Industrials despite modest economic growth.
- Pacific markets advanced on strong Japanese equities were supported by improving corporate earnings and governance reforms.
- Latin America lagged as weaker commodity prices offset improving global risk appetite.



- Emerging markets outperformed developed regions, driven by sustained AI investment and Technology leadership.
- Emerging Asia remained the strongest region as semiconductor exports fueled earnings growth.
- Developed international markets produced solid returns despite lower Technology exposure than emerging markets.
- Japanese equities benefited from improving profitability, shareholder reforms, and a supportive economic backdrop.
- European markets advanced as Financials, Industrials, and improving business confidence supported returns.
- Commodity-oriented emerging regions generally trailed Technology-driven markets as AI remained the dominant investment theme.

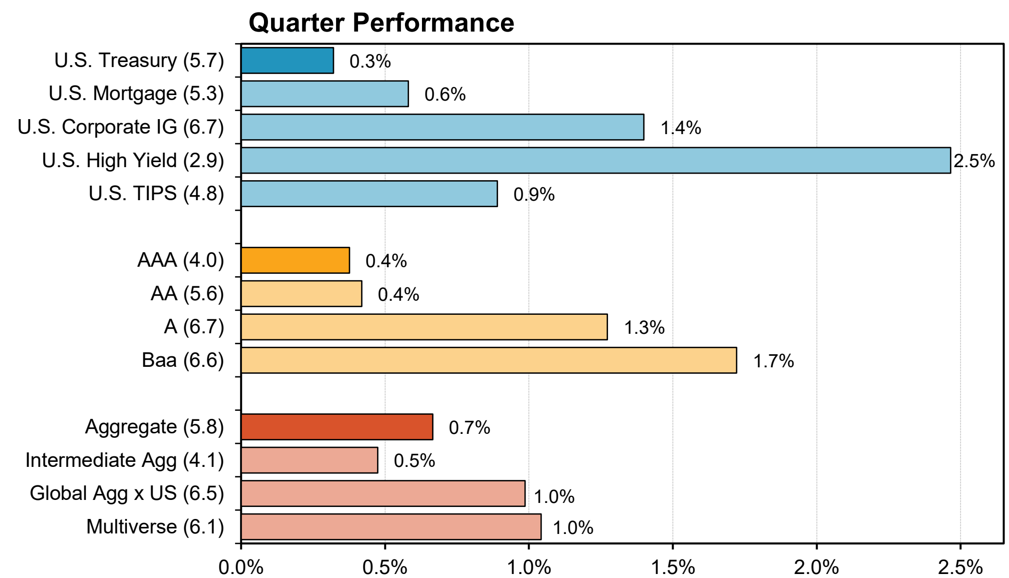
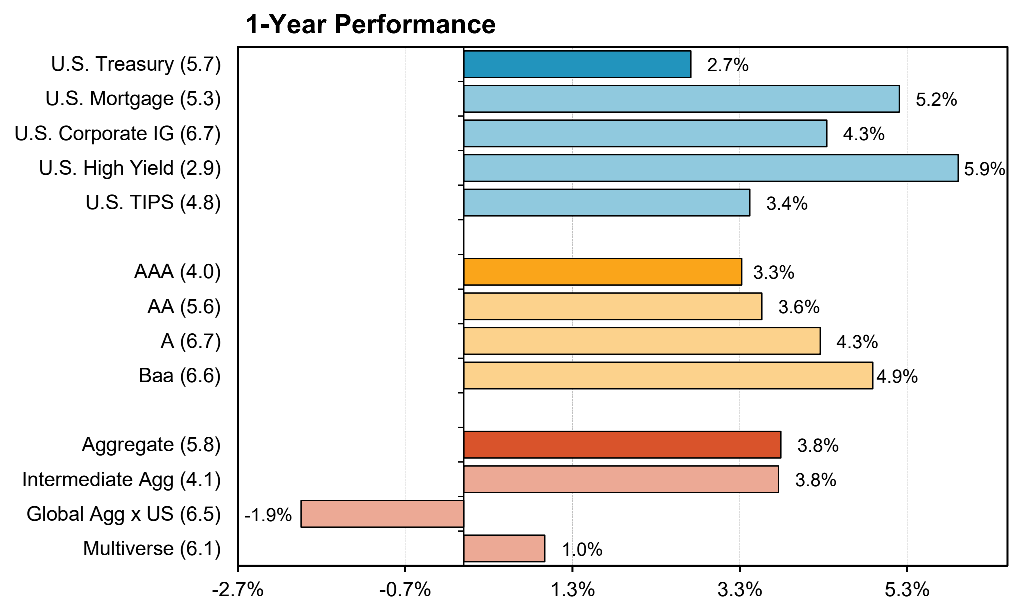
Source: Morningstar Direct, MSCI Global Index Monitor (Returns are Net in USD)

- High yield bonds led fixed income as improving risk sentiment compressed credit spreads.
- Corporate bonds outperformed Treasuries on resilient earnings and healthy balance sheets.
- Baa-rated corporates led higher-quality credit as resilient earnings and healthy balance sheets reduced perceived default risk.
- Inflation-protected securities benefited from elevated inflation but lagged spread sectors.
- Global bonds were supported by improving credit conditions despite rising sovereign yields.
- Government bonds trailed as higher interest rates pressured longer-duration securities.

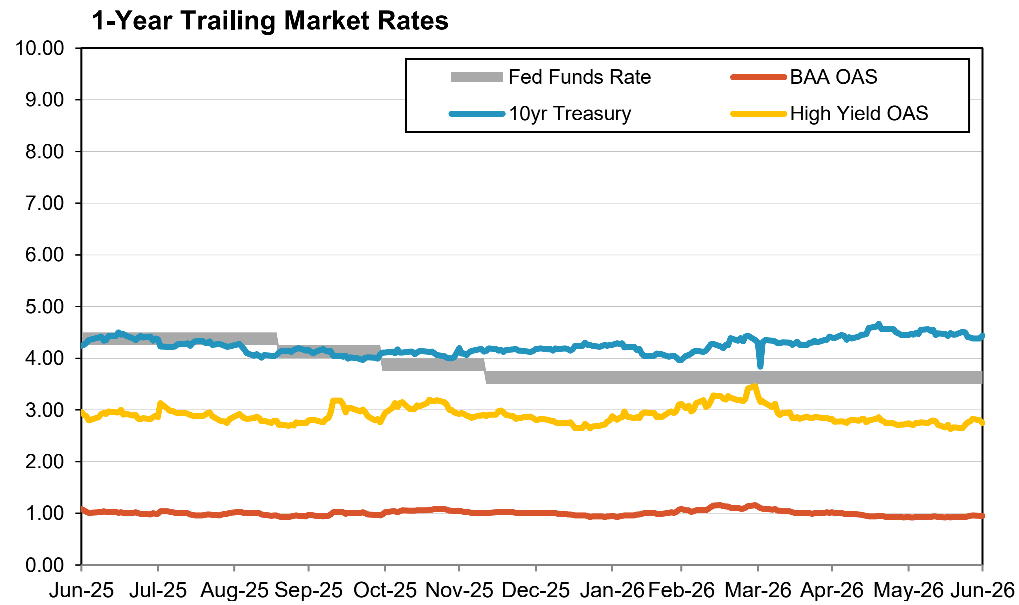


- Credit-sensitive sectors outperformed as recession concerns eased and default expectations remained low.
- High yield benefited from attractive income and resilient corporate fundamentals.
- Investment-grade corporates generated solid returns through stable credit quality and higher starting yields.
- Mortgage-backed securities recovered as elevated yields improved income potential.
- Treasury returns remained constrained by higher policy rates and persistent inflation uncertainty.
- Elevated bond yields continue to improve long-term income opportunities across diversified fixed income portfolios.



Source: Morningstar Direct; Bloomberg

- Credit spreads narrowed as resilient earnings reduced concerns about corporate defaults.
- High yield spreads tightened the most as recession fears continued to recede.
- Investment-grade spreads remained historically tight, reflecting healthy corporate balance sheets.
- The Federal Reserve maintained a restrictive policy stance as inflation remained above target.
- Markets shifted from expecting rate cuts toward pricing a higher-for-longer policy environment.
- Credit markets remained constructive as economic growth continued despite elevated borrowing costs.



- Treasury yields moved higher as stronger economic data delayed expectations for monetary easing.
- Stronger economic growth and a higher-for-longer Federal Reserve outlook pushed intermediate- and long-term Treasury yields higher.
- The front end of the curve remained anchored by the Federal Reserve's restrictive policy stance.
- Longer-term yields reflected resilient growth expectations and increased Treasury supply.
- The yield curve remained relatively flat as investors balanced inflation risks against slowing growth.
- Elevated yields continue providing more attractive income opportunities than investors have seen in years.

Blmbg. U.S. Gov't/Credit	40.00

Returns prior to 1/1/2023 are from the prior consultant.

Returns for periods greater than one year are annualized.

Manager fees associated with money market or cash accounts are not tracked.

Active Return	- Arithmetic difference between the manager's performance and the designated benchmark return over a specified time period.
Alpha	- A measure of the difference between a portfolio's actual performance and its expected return based on its level of risk as determined by beta. It determines the portfolio's non-systemic return, or its historical performance not explained by movements of the market.
Beta	- A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of the portfolio's systematic risk.
Consistency	- The percentage of quarters that a product achieved a rate of return higher than that of its benchmark. Higher consistency indicates the manager has contributed more to the product's performance.
Distributed to Paid In (DPI)	- The ratio of money distributed to Limited Partners by the fund, relative to contributions. It is calculated by dividing cumulative distributions by paid in capital. This multiple shows the investor how much money they got back. It is a good measure for evaluating a fund later in its life because there are more distributions to measure against.
Down Market Capture	- The ratio of average portfolio performance over the designated benchmark during periods of negative returns. A lower value indicates better product performance
Downside Risk	- A measure similar to standard deviation that utilizes only the negative movements of the return series. It is calculated by taking the standard deviation of the negative quarterly set of returns. A higher factor is indicative of a riskier product.
Excess Return	- Arithmetic difference between the manager's performance and the risk-free return over a specified time period.
Excess Risk	- A measure of the standard deviation of a portfolio's performance relative to the risk free return.
Information Ratio	- This calculates the value-added contribution of the manager and is derived by dividing the active rate of return of the portfolio by the tracking error. The higher the Information Ratio, the more the manager has added value to the portfolio.
Public Market Equivalent (PME)	- Designs a set of analyses used in the Private Equity Industry to evaluate the performance of a Private Equity Fund against a public benchmark or index.
R-Squared	- The percentage of a portfolio's performance that can be explained by the behavior of the appropriate benchmark. A high R-Squared means the portfolio's performance has historically moved in the same direction as the appropriate benchmark.
Return	- Compounded rate of return for the period.
Sharpe Ratio	- Represents the excess rate of return over the risk free return divided by the standard deviation of the excess return. The result is an absolute rate of return per unit of risk. A higher value demonstrates better historical risk-adjusted performance.
Standard Deviation	- A statistical measure of the range of a portfolio's performance. It represents the variability of returns around the average return over a specified time period.
Total Value to Paid In (TVPI)	- The ratio of the current value of remaining investments within a fund, plus the total value of all distributions to date, relative to the total amount of capital paid into the fund to date. It is a good measure of performance before the end of a fund's life
Tracking Error	- This is a measure of the standard deviation of a portfolio's returns in relation to the performance of its designated market benchmark.
Treynor Ratio	- Similar to Sharpe ratio but utilizes beta rather than excess risk as determined by standard deviation. It is calculated by taking the excess rate of return above the risk free rate divided by beta to derive the absolute rate of return per unit of risk. A higher value indicates a product has achieved better historical risk-adjusted performance.
Up Market Capture	- The ratio of average portfolio performance over the designated benchmark during periods of positive returns. A higher value indicates better product performance.

Mariner Institutional compiled this report for the sole use of the client for which it was prepared. Mariner Institutional is responsible for evaluating the performance results of the Total Fund along with the investment advisors by comparing their performance with indices and other related peer universe data that is deemed appropriate. Mariner Institutional uses the results from this evaluation to make observations and recommendations to the client. Mariner Institutional uses time-weighted calculations which are founded on standards recommended by the CFA Institute. The calculations and values shown are based on information that is received from custodians. Mariner Institutional analyzes transactions as indicated on the custodian statements and reviews the custodial market values of the portfolio. As a result, this provides Mariner Institutional with a reasonable basis that the investment information presented is free from material misstatement. This methodology of evaluating and measuring performance provides Mariner Institutional with a practical foundation for our observations and recommendations. Nothing came to our attention that would cause Mariner Institutional to believe that the information presented is significantly misstated.

This performance report is based on data obtained by the client’s custodian(s), investment fund administrator, or other sources believed to be reliable. While these sources are believed to be reliable, the data providers are responsible for the accuracy and completeness of their statements. Clients are encouraged to compare the records of their custodian(s) to ensure this report fairly and accurately reflects their various asset positions.

The strategies listed may not be suitable for all investors. We believe the information provided here is reliable, but do not warrant or guarantee its accuracy or completeness. Past performance is not an indication of future performance. Any information contained in this report is for informational purposes only and should not be construed to be an offer to buy or sell any securities or any investment advisory services.

Please note that Neuberger Berman (NB) owns a non-controlling minority stake in Mariner. Certain NB strategies may hold an allocation to the investment in Mariner. For specific impacted strategies, please reach out to your investment consultant or Mariner Institutional at institutionalcompliance@mariner.com

***IMPORTANT DISCLOSURE INFORMATION RE COALITION GREENWICH BEST INVESTMENT CONSULTANT AWARD (formerly known as the Greenwich Quality Leader Award):**
The awards are not indicative of any future performance. The awards or any other rankings and/or recognition by unaffiliated rating services and/or publications should not be construed as a guarantee that a client will experience a certain level of results or satisfaction, nor should it be construed as a current or past endorsement by any of our clients. No fee was paid to participate in this award survey.
The 2024-25 award was issued in February 2025, based on data from February to September of 2024. The 2023 award was issued in April 2024, based on data from Feb to November of 2023. The 2022 award was issued in April 2023, based on data from Feb to November of 2022. The 2021 award was issued in April of 2022, based on data from July to October 2021. Data was collected via interviews conducted by Coalition Greenwich. The 2024 and 2023 awards were issued to Mariner Institutional (formerly AndCo Consulting). The 2021 and 2022 awards were issued to AndCo, prior to becoming Mariner Institutional. The methodology: For the 2024-25 Coalition Greenwich Best Investment Consultant Award for Overall U.S. Investment Consulting – Midsize Consultants – Between February and September 2024, Crisil Coalition Greenwich conducted interviews with 699 individuals from 563 of the largest tax-exempt funds in the United States. For the 2023 Greenwich Best Investment Consultant Award for Overall U.S. Investment Consulting – Midsize Consultants – Between February and November 2023, Coalition Greenwich conducted interviews with 708 individuals from 575 of the largest tax-exempt funds in the United States. For the 2022 Greenwich Best Investment Consultant Award for Overall U.S. Investment Consulting – Midsize Consultants – Between February and November 2022, Coalition Greenwich conducted interviews with 727 individuals from 590 of the largest tax-exempt funds in the United States. For the 2021 Greenwich Best Investment Consultant Award – Overall U.S. Investment Consulting – Midsize Consultants – Between July and October 2021, Coalition Greenwich conducted interviews with 811 individuals from 661 of the largest tax-exempt funds in the United States. These U.S.-based institutional investors are corporate, public, union, and endowment and foundation funds with either pension or investment pool assets greater than $150 million. Study participants were asked to provide quantitative and qualitative evaluations of their asset management and investment consulting providers, including qualitative assessments of those firms soliciting their business and detailed information on important market trends.
